

Find the scooter

This activity helps your child to understand instructions that involve ‘exclusion’, leaving something out or ‘inclusion’, adding something in.

You will need the text message cards and the scooter catalogue sheet for this activity. Ask your child to read the text messages and then choose all the scooters that fit the descriptions. Write the numbers in the boxes below the texts messages. Use the answer sheet to check the answers at the end discussing any differences.

You might need to explain what each exclusion or inclusion word means as follows:

Neither: Explain that this means none,
e.g. “I like **neither** wave handles **nor** drop handles”. “This means don’t pick an scooters with wave handles or drop handles.”

Either: Explain that this means one or the other but not both,
e.g. “I like **either** v shaped handles **or** maxi wheels.” This means you can choose a scooter with v shaped handles or maxi wheels but not both.”

All...Except: Explain that this means everything but the...
e.g. “I like **all** with maxi wheels **except** the yellow ones.” “This means you can choose any scooter with maxi wheels but don’t choose the yellow one.”

Instead of: Explain that this means but not ..,
e.g. “I want a green scooter with v shaped handles **instead of** wave handles.” “This means you can choose a green scooter with v shaped handles but not a green scooter with wave handles.”

Both: Explain this means two things, one and the other,
e.g. “**Both** drop handles and wave handles are nice but not with maxi wheels.” This means you can choose a scooter with drop handles or wave handles but it needs to have micro wheels.”

Variations:

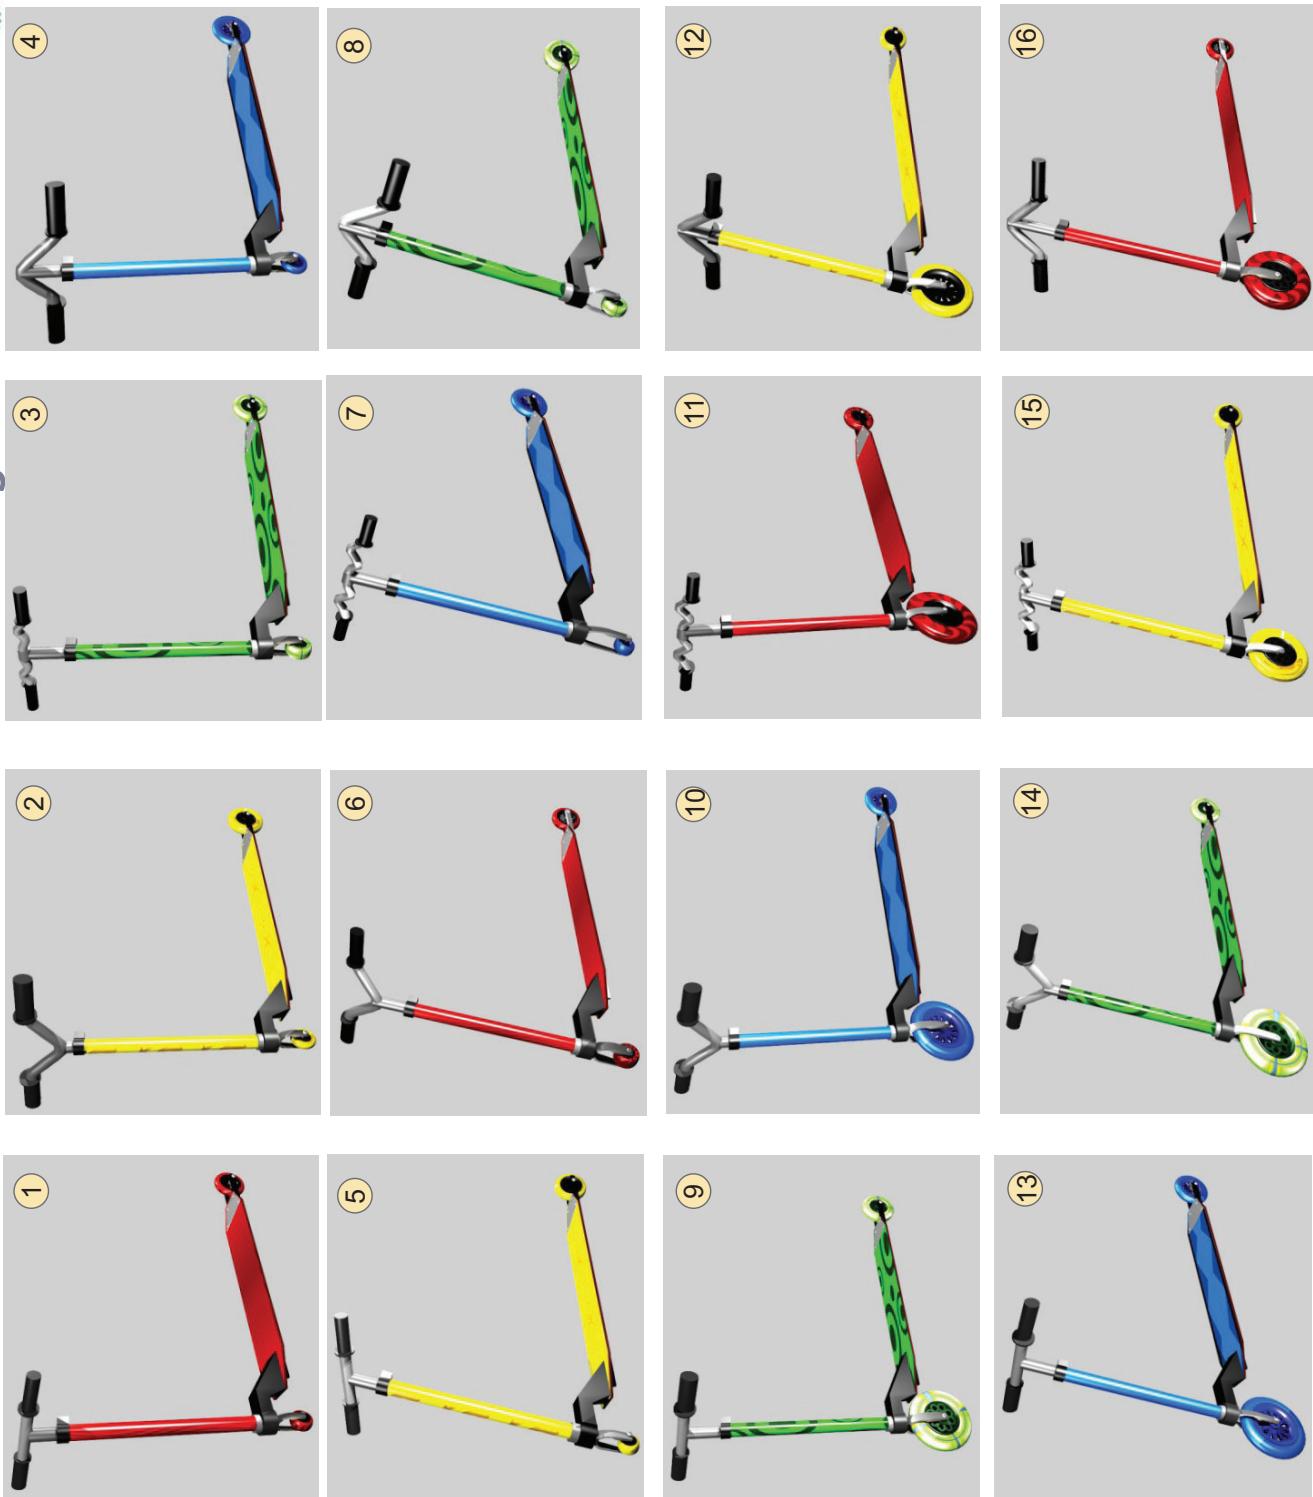

To make this game easier, explaining which scooter you would choose and why,
e.g. “I couldn’t pick v shaped handles and maxi wheels as **either** means pick one of those or the other but not both”.

To make this game harder, think of different instructions which include both exclusion and inclusion words,
e.g. “Choose **either** micro wheels **or** maxi wheels and neither drop handles or wave handles.”
