

# Odd One Out Game

**Objective:** This game develops children's abilities to make links between words, an important skill in vocabulary learning.

**How to play:** You will need a die and counters to play. The first player takes a card. Read the clues for the player to find the odd one out. Ask the player to explain why an item is the odd one out. Then the player rolls the die and moves and play continues with the next player.

To make this game easier, provide more examples from the category.

To make this game harder, ask the child to think of another item that could go with the items that link together, e.g. A doctor and a nurse go together we could also put a hospital porter or a patient because they are in hospital too.

**NB:** This game is based on an original game by Big Leap Resources and is reproduced with their permission.
